

# PURE RAIN™

PURIFIED RAIN WATER

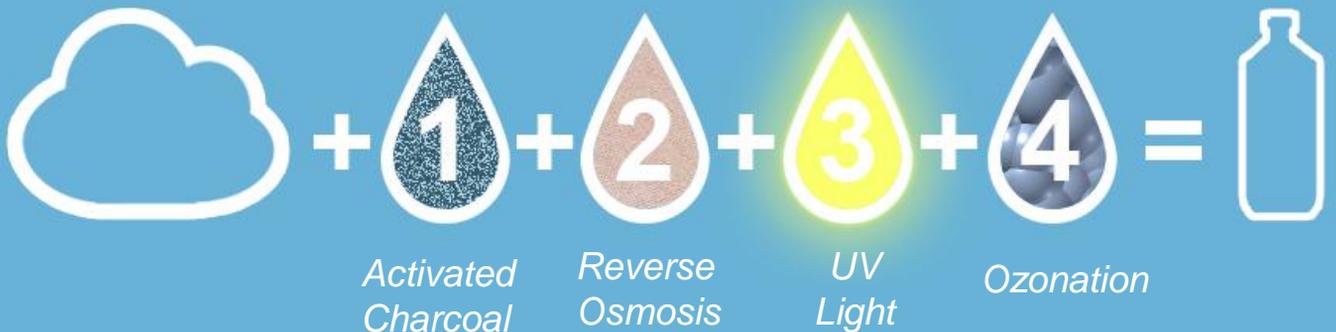

**Our Purpose** Provide the purest drinking water in the world. Pure Rain is 100% rain water.

We are an Austin based company and we capture our rain in Oregon before it touches the Earth and purify it with reverse osmosis and ozonation. The results are an ultrapure, fluoride-free and chemical-free drinking water that most have never experienced.

**Taste the difference!**

**Our Fans** Children are some of our biggest fans. They are very sensitive to taste and know when water is free of trace chemicals. We get comments that range from "It's delicious!" to "Can I have some more?" We love hearing their opinions! Try us and taste the difference.

**Our Responsibility** Share the health benefits that come from eliminating trace chemicals (such as chlorine, fluoride, nitrites, metals, pesticide and drug residues) from our drinking water. Over time, these negatively impact our thyroid, digestive system, and other organs.
